(+91)-8929147374

EXPERIENCE

1. Lovely Professional University(CS&E),Jalandhar—Assistant Professor

(Department of Computer Science and Engineering)

30 July 2024 – Till Present

I taught Server Side Scripting (PHP) and MVC Programming (Laravel) in the previous semester.

Now, in the upcoming semester, I will be teaching Django using Python.

Moving from Server Side Scripting with PHP and MVC with Laravel to Django with Python will give your students a broader perspective on web development frameworks and backend programming.

2. Opstree Solutions Pvt. Ltd., Noida — Network Administrator

15 July 2022 - 31 Jan 2024

Tools Handled: Jenkins, Dynatrace, AWS, GCP, Grafana, Linux, Zabbix, Freshservice, ServiceNow, Prometheus, Node Exporter, Lenskart Testing, Sandbox Testing, Hercules.

Responsibilities:

- Monitoring dashboards in Zabbix, Games 24x7, and Kubernetes on GCP for Miko client.
- Managing transaction data on Rummy Circle portal and handling PID/memory issues on EZ Mall via Jenkins and Zabbix.
- Running cron jobs on Linux and troubleshooting errors with Jenkins.

Projects:

1. **Games 24x7:** Monitor Razorpay, Rummy Circle, Rupay transactions; update Pluto account data when failures occur.
2. **Miko:** Log creation, downtime management, error handling, and Kubernetes operations on GCP.
3. **EZ Mall:** Dashboard monitoring, root cause analysis (RCA), and error resolution using cron jobs and Jenkins.

3. Umbrella Infocare Private Limited,Noida — AWS Engineer

07 July 2021 - 01 July 2022

Tools Handled:

AWS, Site 24x7, Nagios XI, UIPL, Linux, Zoho People, and others.

Responsibilities:

1. Monitoring Auto Scaling servers, RDS clusters, and setting threshold frequencies for various servers on AWS and Site 24x7.
2. Installing agents and Docker, performing root cause analysis (RCA) for RDS clusters, servers, and websites.
3. Creating and following up on tickets using Zoho People.

Projects:

1. **Herocorp, Clovia, Herofin, etc.:** Set thresholds and alarms on EC2 instances, monitor ELB 4xx errors, review logs and RDS clusters, and manage maintenance and downtime for various clients.
2. **Dabur, Danata, Sketchers:** Monitor read/write pages, memory and CPU usage, perform RCA to identify website downtime by region, and resolve underlying causes affecting websites and hosts.

4. **Progressive Infotech Private Limited**,Noida — *Cloud Engineer and NOC Specialist*

03 June 2019 - 31 August 2020

Tools Handled:

AWS, Site 24x7, Nagios XI, UIPL, Linux, Zoho People, and others.

Responsibilities:

1. Monitoring Auto Scaling servers, RDS clusters, and setting threshold frequencies for various servers on AWS and Site 24x7.
2. Installing agents and Docker, performing root cause analysis (RCA) for RDS clusters, servers, and websites.
3. Creating and following up on tickets using Zoho People.

Projects:

1. **Herocorp, Clovia, Herofin, etc.:** Set thresholds and alarms on EC2 instances, monitor ELB 4xx errors, review logs and RDS clusters, and manage maintenance and downtime for various clients.
2. **Dabur, Danata, Sketchers:** Monitor read/write pages, memory and CPU usage, perform RCA to identify website downtime by region, and resolve underlying causes affecting websites and hosts.

Skills:

- Programming Languages: C, C++, Java
 - Web Technologies: HTML, CSS, JavaScript
 - Cloud & Networking: AWS, Cloud Computing, Networking
 - AI, PHP, Machine Learning, DBMS, Linux, SPM, Data Structures
 - Software Testing, Android Development
 - Web Development: PHP,Laravel,Django
-

Tools:

Nagios XI, Dynatrace, Site 24x7, Grafana, Prometheus, Node Exporter, Zabbix, ITSM Symphony SUMMIT, Zoho People, Freshservice, ServiceNow, BuildPiper (Lenskart Testing, Sandbox Testing).

Languages:

English, Hindi, French, Japanese

EDUCATION**Amity University, Noida-M.Tech in Computer Science & Engineering**

September 2022 – June 2024

CGPA: 8.59

IMS Engineering College, Ghaziabad-B.Tech in Information Technology

August 2015 – June 2019

Percentage: 75.86%

(Affiliated to AKTU)

Ajmani International School, Lakhimpur-Kheri-Intermediate (12th)

April 2013 – March 2014

Percentage: 71.8%

(Affiliated to CBSE)

Ajmani International School, Lakhimpur-Kheri-High School (10th)

April 2011 – March 2012

CGPA: 6.8

(Affiliated to CBSE)

PROJECTS**1. Analysis of Big Data in Cloud Computing Technologies**

Published a research paper in **ICRITO IEEE Conference**, Amity Noida

This paper provides a comprehensive overview of various technologies and tools used for big data in cloud computing environments. It discusses the advantages and challenges of big data analytics, focusing on issues such as scalability, security, privacy, and resource management. The paper also highlights current research challenges and proposes potential solutions to address these issues in cloud-based big data analysis.

2. Bitcoin Price Prediction in Stock Market Using LSTM & Transfer Learning

This project focuses on predicting Bitcoin prices, the most well-known cryptocurrency, using machine learning techniques. Key features highly correlated with Bitcoin prices were extracted from the dataset. Random data segments were selected for training and testing an LSTM (Long Short-Term Memory) model, enhanced with transfer learning, to improve prediction accuracy in the volatile financial market.

3. Android Phone Based Video Surveillance System

Developed a mobile video surveillance system enabling remote video monitoring of temporary sites like construction zones. This system allows security personnel to monitor sites 24/7 without requiring a permanent setup, providing flexibility and enhanced security through mobile technology.

4. Skin Cancer Detection and Categorization Utilizing Convolutional Neural Networks, Residual Networks, and Binary Classifiers

Accepted in **ICRITO IEEE Conference**, Amity University, Noida.

This paper presents a deep learning-based approach for skin cancer detection using CNNs, ResNet architectures, and binary classifiers. The model effectively classifies different types of skin cancer, enhancing diagnostic accuracy and early detection.

5. **Automated Student Attendance System Using Real-Time Facial Recognition**
Accepted in **ICRITO IEEE Conference**, Amity University, Noida.
This paper introduces a facial recognition-based system to automate student attendance in real-time. It enhances efficiency and accuracy by eliminating manual entry and minimizing proxy attendance.
 6. **Combining Audio and Video Analytics in a Multi-Modal Method for Fight Detection in Surveillance Systems** accepted in **AITA ,IBS Bangalore**
This paper proposes a multi-modal approach that integrates audio and video analytics to improve the accuracy and efficiency of fight detection in surveillance systems. The method enhances real-time monitoring and threat response by leveraging complementary data sources.
 7. **Synergizing Deep Learning and Machine Learning: A Comprehensive Study of Hybrid Approaches for Heart Disease Prediction** accepted in **AITA ,IBS Bangalore**
This study reviews hybrid models combining deep learning and traditional machine learning techniques to improve heart disease prediction accuracy. It highlights how integrating these methods can better capture complex patterns in medical data.
 8. **Identification of Credit Card Fraud Detection and Solutions: A Comprehensive Review** accepted in **AITA ,IBS Bangalore**
This paper provides an extensive overview of existing credit card fraud detection techniques, analyzing their strengths and limitations. It also discusses emerging solutions and challenges to improve fraud prevention in financial systems.
 9. **A Systematic Review of Flood and Landslide Prediction Using Deep Learning**
Accepted in **IETACS Conference**.
This paper presents a comprehensive review of deep learning techniques applied to flood and landslide prediction. It evaluates various models, datasets, and challenges, offering insights into improving disaster forecasting accuracy.
 10. **Transforming Educational Dynamics: An AI-Driven E-Learning Platform for Improved Instruction and Learning Efficiency**
Accepted in **NMITCON 2025**.
This paper proposes an AI-powered e-learning platform designed to enhance teaching strategies and personalize learning experiences. It leverages intelligent tutoring, analytics, and adaptive content delivery to optimize educational outcomes.
-

CERTIFICATIONS

1. **Android with Core Java** — Netcamp Solutions
2. **Web Development** — Netcamp Solutions
3. **Networking** — Netcamp Solutions
4. **Java** — Nasscom Foundation (in collaboration with Aricent Technologies)

FACULTY DEVELOPMENT PROGRAM

1. Certificate of AI & ML in December & Mid Jan(2024-2025)
 2. Certificate of Full Stack Developer(HTML,CSS,JS, React using JS, Node using JS and Django using Python)
-
